

ANKLE TRAINER BRACE

FOR CHRONICALLY
WEAK OR LAX ANKLES

Model No: 40-850

Sizes: Universal Right
Universal Left

Color: White/Blue

INDICATIONS:

- Chronically Weak/Lax Ankles
- Moderate Sprains
- Post Surgery
- Preventative Sports Brace

BENEFITS:

This brace is made of two rigid plastic shells with an opening at the lateral malleolus. These shells provide maximum support and medial/lateral stability while allowing full dorsi- and plantar-flexion. The shells are lined with a viscoelastic gel that provides cushioning and comfortable compression, while the lateral opening provides pressure relief over a bony prominence. The brace is specific to right or left ankles with strategically placed anterior and posterior straps to create a more intimate fit.

Indicated for mild/moderate sprains and strains, post surgical use, and for chronically weak or lax ankles. ideal for use as a preventative brace during athletic activity to protect weak ankles against injury or prevent further re-injury.

US Patent
D436,177

FEATURES:

- Comfortable and soft viscoelastic gel lined shells with malleolar opening
- Brace straps create an intimate and comfortable fit
- Specific, intimate support for right or left ankle
- Low profile design easily worn with most athletic shoes

HOW TO APPLY:

Place the rigid shell on the medial and lateral sides of the ankle with the malleolar opening on the lateral (outer) side. The heel width is easily customized by adjusting the heel strap. Once sized, trim excess loop from heel strap if necessary. Close the top strap first, followed by front and finally back strap.

CARE INSTRUCTIONS:

Spot clean with a soft cloth and mild soap. Rinse and wipe dry.

SIZING:

Universal design fits most ankles. Specific for right or left ankle.

NOTE: Not recommended for edema.
